

Commodities of concern for export to Russia and Belarus

The US authorities remain concerned about exports that support the development of maritime technology, microelectronics, and other technologies that can be used to support Russia's military and defense sector.

Based upon historical information and current developments, BIS (the US authority for export control) has identified the following commodities as presenting special concern because of their potential diversion to and end use by Russia and Belarus to further their military and defense capabilities: This is not a complete listing of commodities sought by or prohibited for end-users in Russia and Belarus, but this list of commodities that present special concern can assist in the risk-based screening of export-related financial transactions.

Item	Export Control Classification Number ¹²	Item	Export Control Classification Number
Aircraft Parts/ Equipment	9A991	Sonar Systems	6A991
Antennas	7A994	Spectrophotometers	3A999
Breathing Systems	8A992	Test Equipment	3B992
Cameras	6A993	Thrusters	8A992
GPS System	7A994	Underwater Communications	5A991
Inertial Measurement Units	7A994	Vacuum Pumps	2B999
Integrated Circuits	3A001, 3A991, 5A991	Wafer Fabrication Equipment	3B001, 3B991
Oil Field Equipment	EAR99	Wafer Substrates	3C00x
