New job opening @ RespectUs - We're looking for a System Architect

Our Systems Architect is responsible for analyzing processes within our company looking to fulfil customer's needs. He / she acts as the link between users and the technical team in charge of developing the application.

Core responsibilities:

- Set up software architecture system for a SaaS platform
- Work with developers in an agile process
- Analyze and evaluate existing systems for performance
- Perform gap analysis and suggest solutions
- Create plans for change based on analysed requirements
- Facilitate configuration management
- Document changes being made and relevant teaching manuals
- Collaborate with other team members to efficiently implement changes
- Simulate and test suggestions made for performance
- Write user manuals and prepare easy to understand documentation
- Assess, install, and troubleshoot software systems
- Check functionality of the end product
- Communicate with stakeholders (external & internal)

Skills required:

- In-depth knowledge of IT and computer science principles
- Advanced Excel capabilities and SQL knowledge
- Knowledge of data warehousing
- Strong leadership ability and interpersonal skills
- Analytical and critical thinking
- Strong written and verbal communication skills
- Leadership and multitasking skills
- Start-up spirit, great motivation and teamwork skills
- Excellent command of English. French and/or German are considered as an advantage.

Employment conditions:

- This position is based in Luxembourg. Partly remote working solutions can be discussed.
- Contract type: permanent
- Part time or freelance may be discussed.
