# RespectUs among the 20 hottest SpaceTech Startups in Luxembourg

RespectUs, the export control compliance experts in Luxembourg, focussing on space companies, exporters of sensitive goods, their suppliers and banks, figures among the 20 hottest SpaceTech Startups in Luxembourg.

Silicon Luxembourg is ranging RespectUs as an "innovative company in the space sector", "innovating on Luxembourg territory and (...) actively participating in the digital revolution of the space sector and the reindustrialisation of the country". RespectUs would be "worth taking a closer look at".

Thank you Silicon Luxembourg for the amazing recognition of our work. Congratulations to the 19 other Space startups, and happy to contribute to the Luxembourg Space ecosystem.

**This supplement of Silicon Luxembourg magazine focuses on innovative companies in the space sector. The 20 companies presented within these pages are innovating on Luxembourg territory and are actively participating in the digital revolution of the space sector and the reindustrialization of the country. They are worth taking a closer look at.**
