

RespectUS launches career portal dedicated to jobs in export control compliance

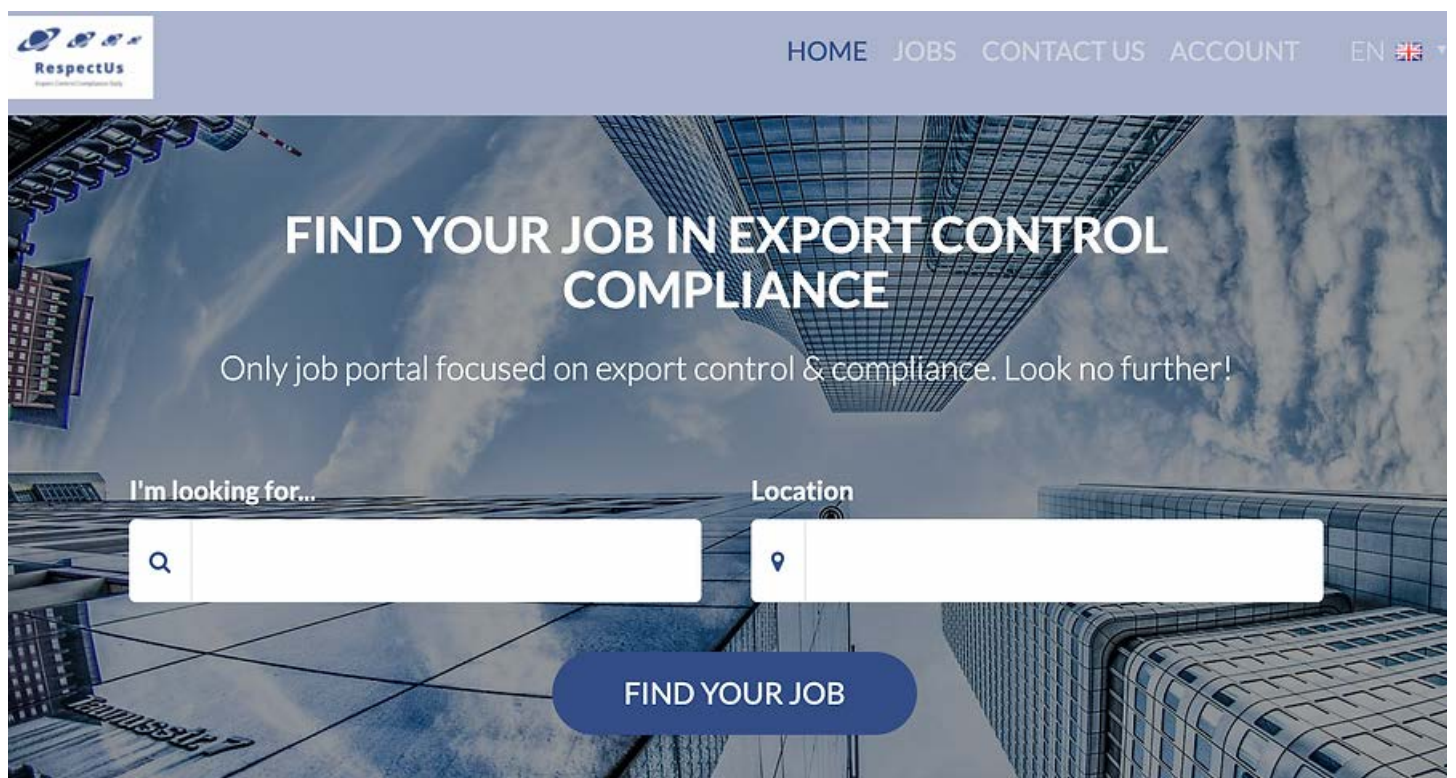

Every company involved in international trade (export and import) must be able to ensure that their business/trading process is in accordance with applicable export control rules and regulations. Such compliance must ensure that transactions and trade processes can run well.

An export control compliance officer exists for that exact purpose. This officer oversees their company's compliance and makes sure their company complies with all domestic and international laws or regulations relating to trade.

We at RespectUs, the experts in export control compliance, are working with exporters of sensitive goods and their suppliers. We are also engaged with export control compliance officers to whom we are providing easier tools to do product classification, customer screening, end-use checks and license determination.

To help our customers to find qualified talents for export control jobs, we have now added to our services a job portal entirely focussed on this niche jobs.

Employers may post their jobs and candidates may build their own candidate profile and apply to the position they'd like to cover. All in 3 languages (English, French and German).

The screenshot shows the homepage of the RespectUS job portal. At the top left is the RespectUS logo. The top right navigation bar includes links for HOME, JOBS, CONTACT US, ACCOUNT, and EN with a flag icon. The main banner features a background image of a modern building facade. The central text reads "FIND YOUR JOB IN EXPORT CONTROL COMPLIANCE" in large white letters, followed by the tagline "Only job portal focused on export control & compliance. Look no further!". Below this are two search input fields: "I'm looking for..." and "Location", each with a magnifying glass icon. At the bottom center is a blue button labeled "FIND YOUR JOB".

The entire job portal is FREE of charge for the initial 3 months period (until 15 September 2022).
